SUMMARY

As an experienced web developer with a **10 years** of track record, I excel in **guiding projects from inception to deployment**, driven by a steadfast commitment to crafting robust web applications. My career has spanned various responsibilities, including front-end and back-end development, DevOps, and product leadership, culminating in a comprehensive skill set that defines me as a versatile and accomplished technology expert.

WORK EXPERIENCE

Software Engineer L4, Personio

2022 - Present

- Built user-friendly HR experiences for small and mid-size businesses, focusing on core functionalities like employee and employment data management.
- Migrated legacy PHP monolith codes to a modern React micro-frontend architecture, improving scalability and maintainability.
- Championed a proactive approach to problem-solving, identifying and resolving product issues through effective scoping and planning.

Lead Product Engineer, Revvsales

2018 - 2022

- Led a team of developers, driving efficient development practices and ensuring code quality for a SaaS product through mentorship and feature delivery.
- Actively engaged in product discussions, bridging engineering and product teams by identifying customer needs and proposing effective solutions.
- Implemented streamlined development processes, accelerating development, testing, and deployment cycles, resulting in faster feature delivery.
- Achieved a 10x improvement in application performance through innovative architectural solutions and spearheaded the transition to a fully automated CI/CD pipeline, increasing release frequency by 80%.

SDE I, Arvind Internet Limited

2015 - 2018

- Pioneered e-commerce development at NNNOW, launching platforms like nnnow.com from scratch and delivering addictive shopping experiences.
- Demonstrated proficiency as a full-stack developer, implementing microservices architecture to enhance user experiences on e-commerce platforms.
- Led product roadmap integration efforts, aligning design concepts with final web applications to ensure user-centric experiences.
- Effectively managed complex data flow between over 30 microservices using Node.js, optimizing data handling for efficient e-commerce operations.

Software Engineer, RentOnGo

Aug 2015 - Dec 2015

- Developed and enhanced user interface (UI) for Rentongo, a one-stop rental platform for lenders and borrowers, focusing on the bike rental service across multiple cities.
- Leveraged Angular framework and RESTful APIs to build responsive web services, ensuring optimal user experience on all devices.

Web Developer, MGE Softwares

2014 - 2015

- Developed and maintained web applications utilizing modern technologies (HTML5, CSS3, Javascript, Bootstrap, PHP, MySQL) for a service-based company.
- Delivered full-stack development across various web platforms, ensuring seamless user experiences.
- Managed project lifecycles from requirements gathering to deployment, collaborating directly with clients to meet their needs.
- Supported server administration tasks including domain registration, DNS management, and VPS account management, etc.
- Provided technical troubleshooting and quality assurance for web applications.

EDUCATION

Bachelor of Engineering in Computer Science

2010 - 2014

Paavai College of Engineering, India

SKILLS

Frontend

React JS • Redux • Jest • TypeScript • JavaScript • HTML • CSS • Next.js • React Query • Zustand • React Router • Testing Library • Playwright • Cypress • Storybook • Tailwind CSS • SASS

Backend

Node.js • ExpressJs • PHP • MySQL • PostgreSQL • Redis

Others:

Git • GitHub • GitLab • Jenkins • Postman

LANGUAGE

English - C1 • Deutsch - A1
